

DMX STUDIO SERIES PATCH CABLE

PART NO.: DMX-200xx

DESCRIPTION: DMX STUDIO series, 4core bare copper, with 5-pin XLR Connectors, Male-Male, FR & ROHS Certified PVC

The KAYBE DMX Studio Series Patch Cable is engineered for accurate and trouble-free DMX data transmissions for stage, theatre, live concerts and other professional lighting control console. The cable features nickel-plated 5-pin XLR connectors. The 24 AWG oxygen-free copper, braid and foil shielding, and PE insulation result in a cable with professional conductivity and interference rejection. It assures a pure transfer of DMX and other digital signals. A PVC jacket provides durability while maintaining flexibility.

KEY FEATURES

1. For DMX Systems
2. Oxygen-Free Conductors
3. Braided Copper Shielding
4. Pure Transfer of DMX Signals
5. 110-120 Ohms Impedance
6. Sturdy Nickel-Plated 5-Pin Connectors

FOR DMX SYSTEMS

Whether you're lighting a live stage or concert event or running DJ lights, the KAYBE DMX cables will connect all your DMX gear to a DMX controller.

110-OHM IMPEDANCE

The cable is manufactured to the industry-standard 110-Ohm resistance for digital signals. This is ideal for transmitting DMX and other digital data.

OXYGEN-FREE COPPER CABLE

The OFC cables provide professional conductivity for reliable signal transfer of your DMX and other digital data signals, even with long cable runs.

INTERFERENCE REJECTION

Braided copper shielding with 92% coverage provides protection against EM and RF interference. A PVC shield and PE insulation deliver additional protection against EM and RF interference and ensure that noise won't compromise your signal.
